

White Eagle's words

May we raise our consciousness to the hilltops, to the quiet, peaceful night, lit with stars, canopied by the gentle music of the pines, and lulled by the distant waves of the sea... far above the noise and clamour of the world. And there, God speaks to your waiting hearts....

You have to learn that humanity is one vast brotherhood of life; that all nature is part of you; you are part of nature; you are part of the animal kingdom; you are part of the air and the birds in the air and the fish in the sea; you are part of the whole of creation, because you are a part of God and all creation is in God.

Think of the sea which may lie still and quiet ... and standing alone in some quiet place, you can reach out and become conscious of the vastness, the depth and the profundity of life. Your frail earthly comprehension reels with the magnificence of the stillness and power of the sea. May the ocean speak to you of the eternal powers which lie within the creation of the universe; the waters enfold you in an enveloping peace and power.

Some will tell you, if they speak from heart's truth, that they feel nearer to God on a lonely sea.

Gracious Spirit of love, we thank you for the beauty which we find in life, in the spirit world, and on this earth plane, and in the hearts of humanity. We thank you for the companionship of animals, flowers and birds; of the great open spaces, and of the sky, and of the running water and the roaring sea; for the quiet wonder of the stars and the moon, and for the warmth of the sun; for the truth and loyalty of friends on earth.
