

Wings of Light Thames Valley White Eagle Star Centre

Newsletter No.29 - December 2020

Dear Members and Friends,

I hope you have all managed to avoid the virus that has made it a challenging year on so many levels. Nothing seems certain as events swirl around us first this way, and then that. The one thing we should try to hold on to is that it's all planned in the universal scheme of things, we just don't know what it is! This is surely a time of change, the best we can do is place ourselves under the star and keep steady, holding the light for all to see.

This has been a time when hearts open and help is offered with love, and accepted with love by those around us, producing a feeling of community of spirit in a time of need. I'm sure you have all been helping others, and making phone calls to a friend or relative and brightened their day by showing you care.

We don't know what the New Year will bring so I'm unable to offer any events at this time, if this changes I will be in touch. Many of us continue to hold the Earth Healing service on Sundays at 12 noon in our own homes, if you would like to join in with his then let me know and I will send you the service. For those of you with access to computers I expect you are aware the ministers of the Lodge are holding services and talks on Zoom. I have asked for audio CD's to be produced for those who cannot join in with this. Colum is endeavouring to get to grips with this and will let us all know when they're available.

At this time the Trustees and a working group are hoping to redesign the webpage to modernise it and bring it up to date. I also hope they are looking at a way forward to include the non computer members into the services and retreat days by joining in on their phones to these events as they happen. You can also choose where you want to be in the house on the phone to join in, in the comfort of your armchair, or lying on your bed!! I have given the working group the information for them to take it further. Having been on a couple of these zoom events I have to say you spend most of the time listening to others, so the screen, nice as it is, is not really necessary to feel involved. I hope you will be able to choose the CD or the phone connection soon.

Words at this time from White Eagle:

“We greet you brethren of the earth, and ask you to close the outer senses and be conscious of the great spiritual company present. Sometimes you are apt to forget the unseen congregation, as around and above you are hosts of spiritual beings. We bring from the world of spirit the blessing of peace and love, and we pray that this power, this blessing will enter your soul that you may be raised up into the world of light. This is the purpose of our message to you all on the threshold of the New Year. A new age is dawning upon your earth and every day that you live you are stepping forward, if your heart and vision is full of love and light. Now there are many people in the world today who are full of gloom and doom, and they can only see destruction or things deteriorating on the earth plane, but there others who see the reverse, those that are in the light aspire towards the light because they have the Christ light growing in their hearts. You stand on this threshold of a new age, and before this spirit and true brotherhood can be established on earth, there must be a breaking up and a cleansing of that which has outlived its purpose. If you look back through the ages you will see how wise it has been to break up the crust and discard the ignorance under which humanity has been living and labouring for a long time. In this breaking up, this cleansing of the waters, there is an inflow of pure truth which is now coming to the world. The very first thing that you have to establish in your consciousness is the truth of your own spiritual being. The wonder of this truth is that the Creator has planted in your heart the seed, the seed which as it germinates and grows will flower and radiate light all around it, not only in your immediate vicinity of the man or woman, but it is radiating very far into the surrounding life of the individual. Help to raise the whole earth into the light, you will not get weary doing so, you will be strengthened in your work, strengthened in your life. Cast out all doubt, fear and darkness, walk your path, a shining light, and light the way for many others to follow. This is what we would have you remember at the beginning of this New Year. You are pioneers of this new age of Aquarius and may the Great Spirit bless you all, dear dear brethren of the earthly life. Go into this New Year with love and hope in your hearts and know that we are with you on your journey.”

I wish you all a happy Christmas, which I'm sure will be a little different this year, and a peaceful and healthy New Year, keep your spiritual light shining bright. In the meantime take care and stay well everyone!!

With much love

Pat
